

Why did you decide to do an apprenticeship with Ingleton Wood?

I had applied to study architecture at a couple of London universities but I was searching for apprenticeships in the industry as well – when the role at Ingleton Wood came up and was local it was ideal for me.

How have you found it so far?

I really enjoy coming into the office, everyone has been friendly and helped me out in learning new software and establishing my role in the team.

What does your role involve?

I'm generally doing drawings for other members of the architectural team or developing preliminary 3D modelling of designs which means I am working on a variety of projects which is great experience. I am also going out to perform site surveys, writing up and issuing reports for clients and stakeholders.

Would you recommend an apprenticeship at Ingleton Wood?

The company are really supportive of apprentices, my apprenticeship coordinator has been in almost constant contact with my University sorting out any queries I had at enrolment stage and my mentor has been a great help in my day to day learning and coursework support.
